PROJECTS

Sales and Inventory Management System | Visual Basic, MySQL | 2024 - 2026

- Developed a desktop-based sales and inventory management system.
- Implemented CRUD operations for managing products, inventory, users, suppliers, categories and transaction records.
- Design database-driven functionality for recording sales and maintaining inventory information.
- Implemented DataGridView-based interfaces for product and transaction management.

Responsive E-Commerce Website | HTML5, CSS3, JavaScript, LocalStorage | 2026

- Developed a responsive e-commerce website to strengthen my skills in JavaScript, DOM manipulation, and front-end styling skills.
- Built a shopping cart system that allows users to add products, manage cart items, and retain cart data in Local Storage.
- Developed interactive product modal that display product details when users select an item.
- Created a dynamic product search feature with product suggestion, filtering and can redirect to product modal.
- Added responsive layouts, simple UI animations, and interactive components to improve the overall user experience.

Job Application Tracker | HTML5, CSS3, JavaScript, PHP, MySQL, REST API | 2026

- Developed a full-stack web application for managing job applications with user registration, Login, application tracking, editing, deletion, and status management.
- Built PHP/MySQL REST API endpoints supporting authenticated GET, POST, PUT, DELETE operations.
- Implemented session-based authentication, password hashing, prepared SQL statements Authenticated API requests, and user-specific data access.

EDUCATION

The Fisher Valley College | *Bachelor of Science in Information Technology* | 2022 - 2026
